

Proposal of a 45 GeV ERL	Miho Shimada	High Energy Accelerator Research Organization	
Defining the new FCC-ee baseline optics	Jacqueline Keintzel	European Organization for Nuclear Research	
Accelerator Design Educational Primer – Conceptualizing and Optimizing the Hybrid LHeC-like Electron-Ion Collider Design	Andrei Seryi	Old Dominion University	
High-intensity LHC tests in 2025 for transverse beam dynamics studies	Nicolas Mounet	European Organization for Nuclear Research	
Overview of electron beams for compact tools of ultrafast science	Vitaliy Goryashko	Uppsala University	
WaterFEL: Project Update on the New Canadian Infrared Free Electron Laser Facility	Mark Boland	University of Saskatchewan	
Status of the PETRA IV accelerators upgrade	Riccardo Bartolini	Deutsches Elektronen-Synchrotron DESY	
Overview of attosecond hard X-ray free-electron laser development at the European XFEL	Jiawei Yan	Deutsches Elektronen-Synchrotron DESY	
Measurements of single-shot attosecond X-ray pulses at high repetition rate	Veronica Guo	Stanford University	
UK XFEL: the UK vision for next-generation XFELs	David Dunning	Science and Technology Facilities Council	
Commissioning and initial operation of a Compact FEL-THz facility at IUAC, New Delhi	Bhuban Kumar Sahu	Inter-University Accelerator Centre	
Overview of the DONES Programme	Philippe Cara	Fusion for Energy	MC1
Progress Towards High-Repetition-Rate Plasma Wakefield Acceleration at FLASHForward	Judita Beinortaitė	Deutsches Elektronen-Synchrotron DESY	MC2
Developing a Hybrid Accelerating Structure Based on Short-Pulse Structure Wakefield Acceleration	Gongxiaohui Chen	Argonne National Laboratory	MC3
Fermilab Main Injector 1 MW Average Target Beam Power Record	Kyle Hazelwood (tbc)	Fermi National Accelerator Laboratory	MC4
Commissioning of the IOTA proton injector	Aleksandr Romanov	Fermi National Accelerator Laboratory	MC5
FIRST EXPERIMENTAL DEMONSTRATION OF USING A CRAB-CROSSING COLLISION SCHEME FOR EFFICIENT LASER-TO-ION BEAM INTERACTION	Alexander Aleksandrov	Fermi National Accelerator Laboratory	MC6
Simultaneous acceleration of two ions with unequal mass-to-charge ratio in a synchrotron	David Ondreka	Oak Ridge National Laboratory	MC7
Bunch lengthening with double- and triple-rf systems for MAX4U	Murilo Barbosa Alves	GSI Helmholtz Centre for Heavy Ion Research	MC8
Beam Profile Shaping using Nonlinear Active Plasma Lenses	Oscar Lochet (TBC)	MAX IV Laboratory	
Design of NSLS-II lattice with complex bend replacement	Minghao Song	Université Paris-Saclay	
Universal Representation of Chromatic Aberration in Electron Beam Optics	Hitoshi Tanaka	Brookhaven National Laboratory	
A Hybrid Physics and Data-Driven Modeling Framework for Accelerators with Automatic Differentiation	Yue Hao	RIKEN SPring-8 Center	
Using Neural-Network Ansatz for the Generating Function in Hamilton-Jacobi Equation to Obtain Symplectic Transfer Maps for Elements with Any Magnetic Field Configuration	Ihar Lobach	Facility for Rare Isotope Beams	
Laser Wire Scanning for 2D Electron Beam Size Measurement in Slant-Scattering Mode at SLEGS	ZhenWei Wang	Argonne National Laboratory	
Application of deep learning methods for online beam optics and coupling feedback in synchrotron light sources	Liyuan Tan	Shanghai Institute of Applied Physics, Chinese Academy of Sciences	
Overview of the RF based beam diagnostic monitors of HIPA at PSI	Jilei Sun	Shanghai Advanced Research Institute	
THz Streaking Diagnostics of RF-Compressed Few-Femtosecond Relativistic Electron Bunches	Maximilian Lenz (tbc)	Paul Scherrer Institute	
Application of novel RF direct sampling electronics for SHINE cavity BPM	Yuxin Han	Particle Beam Physics Lab (PBPL)	
A Low Cost Picoseconds Precision Timing and Synchronization Over A Kilometer	Alice Renaux	Shanghai Institute of Applied Physics	
Moonlight on the Serengeti: Casting (Digital) Shadows with NALA, SIMBA, PUMBAA and Friends	James Jones	Centre National de la Recherche Scientifique	
The Potential of Multi-Material Additive Manufacturing Illustrated by an RFQ Prototype	Michael Mayerhofer	Science and Technology Facilities Council	
The superconducting magnets for FAIR - overview and project status	Kei Sugita	Universität der Bundeswehr München	
Klystron X-Ray Diagnostic	Jesus Valladares	GSI Helmholtz Centre for Heavy Ion Research	
The First Beam Produced by A Conduction Cooled SRF Photogun	Chunguang Jing	Los Alamos National Laboratory	
High Reliability Digital Control Magnet Power Supply System for SPring-8-II	Chikara Kondo	Euclid Techlabs (United States)	
Recent Developments in RF Stabilization at the SPARC_LAB Facility of LNF-INFN	Xianghe Fang	Japan Synchrotron Radiation Research Institute	
Qualification and commissioning of superconducting magnets for the S3 spectrometer at GANIL	Marc-Hervé Stodel	Istituto Nazionale di Fisica Nucleare, Laboratori Nazionali di Frascati	
Commercial Accelerators for Proton Therapy - An Overview	Andreas Peters	Grand Accélérateur Nat. d'Ions Lourds	
Mapping Global Collaboration in Accelerator Research	Annabella Zamora	Heidelberg Ionenstrahl-Therapie Centrum
