

FCC-ee Injector Complex: Status, Highlights and Outlook	Paolo Craievich	Paul Scherrer Institute European Organization for Nuclear Research	
Defining the new FCC-ee baseline optics	Jacqueline Keintzel		
Accelerator Design Educational Primer – Conceptualizing and Optimizing the Hybrid LHeC-like Electron-Ion Collider Design	Andrei Seryi	Old Dominion University European Organization for Nuclear Research	
Preparation of the 2026 LHC high-intensity tests in view of HL-LHC	Nicolas Mounet		
Overview of electron beams for compact tools of ultrafast science	Vitaliy Goryashko	Uppsala University	
WaterFEL: Project Update on the New Canadian Infrared Free Electron Laser Facility	Mark Boland	University of Saskatchewan	
Status of the PETRA IV accelerators upgrade	Kostantinos Paraschou	Deutsches Elektronen-Synchrotron DESY	
Overview of attosecond hard X-ray free-electron laser development at the European XFEL	Weilun Qin	Deutsches Elektronen-Synchrotron DESY	
Measurements of single-shot attosecond X-ray pulses at high repetition rate	Veronica Guo	Stanford University	
UK XFEL: the UK vision for next-generation XFELs	David Dunning	Science and Technology Facilities Council	
Commissioning and initial operation of a Compact FEL-THz facility at IUAC, New Delhi	Bhuban Kumar Sahu	Inter-University Accelerator Centre	
Overview of the DONES Programme	Ivan Podadera	IFMIF-DONES	MC1
ELBA all-optical PW laser - GeV electron collider	Carlo Maria Lazzarini	Extreme Light Infrastructure ERIC	MC2
Developing a Hybrid Accelerating Structure Based on Short-Pulse Structure Wakefield Acceleration	Chunguang Jing	Euclid Techlabs	MC3
Fermilab Main Injector 1 MW Average Target Beam Power Record	Kyle Hazelwood	Fermi National Accelerator Laboratory	MC4
Commissioning of the IOTA proton injector	Aleksandr Romanov	Fermi National Accelerator Laboratory	MC5
First experimental demonstration of using a crab-crossing collision scheme for efficient laser-to-ion beam interaction	Alexander Aleksandrov	Oak Ridge National Laboratory	MC6
Simultaneous acceleration of two ions with unequal mass-to-charge ratio in a synchrotron	David Ondreka	GSI Helmholtz Centre for Heavy Ion Research	MC7
Bunch lengthening with double- and triple-rf systems for MAX4U	Murilo Barbosa Alves	MAX IV Laboratory	MC8
Experimental beam dynamics measurements of nonlinear quasi-integrable lattices	Nikita Kuklev	FNAL	
Design of NSLS-II lattice with complex bend replacement	Guimei Wang	Brookhaven National Laboratory	
Universal Representation of Chromatic Aberration in Electron Beam Optics	Hitoshi Tanaka	RIKEN SPring-8 Center	
A Hybrid Physics and Data-Driven Modeling Framework for Accelerators with Automatic Differentiation Using Neural-Network Ansatz for the Generating Function in Hamilton-Jacobi Equation to Obtain Symplectic Transfer Maps for Elements with Any Magnetic Field Configuration	Yue Hao	Facility for Rare Isotope Beams	
Laser Wire Scanning for 2D Electron Beam Size Measurement in Slant-Scattering Mode at SLEGS	Ihar Lobach	Argonne National Laboratory	
Overview of the US DOE Multi-Office particle Accelerator Team (MOAT) project	ZhenWei Wang	Shanghai Institute of Applied Physics, Chinese Academy of Sciences	
Overview of the RF based beam diagnostic monitors of HIPA at PSI	Jean-Luc Vay	Lawrence Berkeley National Laboratory	
Development and First Beam Observations of an Ultra-Fast Bunch-by-Bunch X-ray Beam Size Monitor at SuperKEKB	Jilei Sun	Paul Scherrer Institute	
Application of novel RF direct sampling electronics for SHINE cavity BPM	Riku Nomaru	University of Tokyo	
A Low Cost Picoseconds Precision Timing and Synchronization Over A Kilometer	Yuxin Han	Shanghai Institute of Applied Physics Centre National de la Recherche Scientifique	
Moonlight on the Serengeti: Casting (Digital) Shadows with NALA, SIMBA, PUMBAA and Friends	Alice Renaux	Science and Technology Facilities Council	
The Potential of Multi-Material Additive Manufacturing Illustrated by an RFQ Prototype	James Jones		
The superconducting magnets for FAIR - overview and project status	Michael Mayerhofer	Universität der Bundeswehr München GSI Helmholtz Centre for Heavy Ion Research	
Dipole powering failure criticality and mitigation for FCC-ee	Kei Sugita	European Organization for Nuclear Research	
The First Beam Produced by A Conduction Cooled SRF Photogun	Delphine Domange		
High Reliability Digital Control Magnet Power Supply System for SPring-8-II	Chunguang Jing	Euclid Techlabs (United States) Japan Synchrotron Radiation Research Institute	
Recent Developments in RF Stabilization at the SPARC_LAB Facility of LNF–INFN	Chikara Kondo	Istituto Nazionale di Fisica Nucleare, Laboratori Nazionali di Frascati	
Qualification and commissioning of superconducting magnets for the S3 spectrometer at GANIL	Xianghe Fang	Grand Accélérateur Nat. d'Ions Lourds	
Commercial Accelerators for Proton Therapy - An Overview	Marc-Hervé Stodel		
technologies for environmental impact	Andreas Peters	Heidelberg Ionenstrahl-Therapie Centrum Research	
	Enrico Chesta
